## Mark Scheme (Results) Summer 2010

## GCE

## GCE Statistics S3 (6691/ 01)

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.
Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.
For further information, please call our GCE line on 08445760025 , our GCSE team on 0844 576 0027, or visit our website at www.edexcel.com.

If you have any subject specific questions about the content of this Mark Scheme that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Ask The Expert can be accessed online at the following link:

## Hypothesis Tests (Final M1A1)

For an incorrect comparison (e.g. probability with $z$ value) even with a correct statement and/ or comment award MOAO

For a correct or no comparison with more than one statement one of which is false
Award MOAO (This is compatible with the principle above of contradictory statements being penalised)

Apply these rules to all questions

(b)

Use of

means \& \begin{tabular}{ll}

| $1^{\text {st }} \mathrm{M} 1$ |
| :--- |
| $1^{\text {st }} \mathrm{A} 1$ |
| $2^{\text {nd }} \mathrm{dM} 1$ | \& | for attempting $J-P$ and $\mathrm{E}(J-P)$ or $P-J$ and $\mathrm{E}(P-J)$ |
| :--- |
| for variance of 21 (Accept $9+12)$. Ignore any slip in $\mu$ here. |
| for attempting the correct probability and standardising with their mean and sd. |
| This mark is dependent on previous M so if $J-P($ or $P-J)$ is not being used score M0 | <br>

| If their method is not crystal clear then they must be attempting $\mathrm{P}(Z<-$ ve value) or |
| :--- |
| $\mathrm{P}(Z>+$ ve value) i.e. their probability after standardisation should lead to a prob. $<0.5$ |
| so e.g. P( $J-P<0)$ leading to 0.5871 is M0A0 unless the M1 is clearly earned. |
| for awrt 0.413 or 0.414 | <br>

$2^{\text {nd }} \mathrm{A} 1$
\end{tabular} <br>

\end{tabular}

| Question Number | Scheme | Marks |
| :---: | :---: | :---: |
| Q7 ${ }^{\text {(a) }}$ | Label full time staff 1-6000, part time staff 1-4000 | M1 |
|  | Use random numbers to select | M1 |
|  | Simple random sample of 120 full time staff and 80 part time staff | A1 (3) |
|  | Enables estimation of statistics / errors for each strata or "reduce variability" or "more representative" or "reflects population structure" NOT "more accurate" | B1 (1) |
|  | $\mathrm{H}_{0}: \mu_{f}=\mu_{p}, \quad \mathrm{H}_{1}: \mu_{f} \neq \mu_{p} \quad \quad \text { (accept } \mu_{1}, \mu_{2} \text { ) }$ | B1 |
|  | $\text { s.e. }=\sqrt{\frac{21}{80}+\frac{19}{80}}, \quad z=\frac{52-50}{\sqrt{\frac{21}{80}+\frac{19}{80}}}=(2 \sqrt{2})$ | M1,M1 |
|  | $=2.828 \ldots \quad$ (awrt 2.83) | A1 |
|  | Two tailed critical value $\mathrm{z}=2.5758$ (or prob of awrt $0.002(<0.005)$ or $0.004(<0.01)$ ) | B1 |
|  | [2.828 > 2.5758 so] significant evidence to reject $\mathrm{H}_{0}$ | dM1 |
|  | There is evidence of a difference in policy awareness between full time and part time staff | A1ft (7) |
| (d) | Can use mean full time and mean part time | B1 |
|  | $\sim$ Normal | B1 (2) |
|  | Have assumed $s^{2}=\sigma^{2}$ or variance of sample = variance of population | B1 (1) |
| (f) | $2.53<2.5758$, not significant or do not reject $\mathrm{H}_{0}$ So there is insufficient evidence of a difference in mean awareness | $\begin{array}{\|l} \text { M1 } \\ \text { A1ft } \tag{2} \end{array}$ |
| (g) | Training course has closed the gap between full time staff and part time staff's mean awareness of company policy. | B1 (1) |
|  |  | 17 |
| (a) | $1^{\text {st }}$ M1 for attempt at labelling full-time and part-time staff. One set of correct numbers. <br> $2^{\text {nd }} \mathrm{M} 1$ for mentioning use of random numbers <br> $1^{\text {st }}$ A1 for s.r.s. of 120 full-time and 80 part-time |  |
| (c) | $1^{\text {st }}$ M1 for attempt at s.e. - condone one number wrong. NB correct s.e. $=\sqrt{\frac{1}{2}}$ |  |
|  | $3^{\text {rd }} \mathrm{dM} 1$ dep. on $2^{\text {nd }} \mathbf{M 1}$ for a correct statement based on their normal cv and their test statistic $2^{\text {nd }} \mathrm{A} 1$ for correct comment in context. Must mention "scores" or " policy awareness" and types of "staff". Award A0 for a one-tailed comment. Allow ft |  |
| (d) | $1^{\text {st }} \mathrm{B} 1$ for mention of mean(s) or use of $\bar{X}$, provided $\bar{X}$ clearly refers to full-time or part-time $2^{\text {nd }} \mathrm{B} 1$ for stating that distribution can be assumed normal |  |
| (f) | M1 for correct statement (may be implied by correct contextualised comment) |  |
| (g) | B1 for correct comment in context that implies training was effective. <br> This must be supported by their (c) and (f). Condone one-tailed comment here. |  |
