## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer all questions.
Write your answers in the spaces provided in this booklet. If you run out of space, use the continuation pages at the back of the booklet, taking care to number the question(s) correctly.

## INFORMATION FOR CANDIDATES

The number of marks is given in brackets at the end of each question or part-question.
You are reminded of the necessity for good English and orderly presentation in your answers.

## SECTION A

Answer all the questions in the spaces provided.
You are advised to spend approximately 30 minutes on this section.

Use the diagram below to answer questions 1 and 2. The diagram illustrates a firm operating in long run equilibrium in monopolistic competition.

1. Which of the following levels of output corresponds to where the firm is allocatively and productively efficient?

| Allocative <br> efficiency | Productive <br> efficiency | ANSWER <br> Tick $(\checkmark)$ one box only |  |
| :---: | :---: | :---: | :---: |
| A | W | Y | $\square$ |
| B | X | Z | $\square$ |
| C | Z | Y | $\square$ |
| D | Y | $\square$ |  |
| E | Y | $\square$ |  |

2. What would be the change in the firm's output if it switched from an objective of profit maximisation to one of sales revenue maximisation?

ANSWER
Tick ( $/$ ) one box only

3. A firm reduces the price of a particular product from $£ 10$ to $£ 8$ and as a result total revenue rises from $£ 2000$ to $£ 2080$. The price elasticity of demand for this product is:

ANSWER
Tick ( $\checkmark$ ) one box only

| A | -0.2 | $\square$ |
| :--- | :--- | :--- |
| B | -0.67 | $\square$ |
| C | -1.5 | $\square$ |
| D | -5 | $\square$ |
| E | -40 | $\square$ |

4. An economy has two major sectors, mineral extraction and agriculture. As a result of years of mineral extraction, its mineral reserves are falling and extraction is becoming increasingly difficult. However, more advanced production methods are being introduced into agriculture. As a result of these changes the economy's production possibility frontier (PPF) shifts from $X X$ to $Y Y$.

Which diagram best illustrates the change in the economy's PPF?

ANSWER
Tick ( $($ ) one box only
A $\square$
B
C
D

E
5. In the diagram below, point $A$ indicates the equilibrium price and quantity of white rice sold in a country per year. Suppose that there is a decrease in the price of brown rice and an increase in sales tax on white rice. Which point (U-Z) marks the most likely new equilibrium in the market for white rice?

ANSWER
Tick ( $($ ) one box only
A
U
B
V
C
X
Y
E
Z

6. As a result of an increase in the Bank of England's base rates, a firm's interest payments on its loans increase. What is the likely impact on its marginal and average cost?

|  | Marginal <br> Cost | Average <br> Cost | ANSWER <br> Tick ( $)$ one box only |
| :--- | :--- | :--- | ---: |
| A | Increase | Increase | $\square$ |
| B | Increase | No change | $\square$ |
| C | No change | Increase | $\square$ |
| D | Fall | Increase | $\square$ |
| E | Increase | Fall | $\square$ |

| 7. | A significant increase in consumer spending is most likely to affect the economy in which of the following ways? |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Unemployment | Inflation | Current <br> Account | Budget balance | ANSWER <br> Tick ( $/$ ) one box only |
|  | A | Fall | Rise | Worsen | Worsen |  |
|  | B | Rise | Fall | Improve | Worsen |  |
|  | C | Fall | Rise | Improve | Improve |  |
|  | D | Fall | Rise | Worsen | Improve |  |
|  | E | Rise | Rise | Improve | Worsen |  |

8. Study the chart below:

Greece annual GDP growth rate (quarterly data)

It can be concluded that over the period shown, Greece's GDP was:
ANSWER
Tick ( $/$ ) one box only
A Highest at the end of the period
B $\quad$ Highest in the second quarter of 2015
C $\quad$ Highest in the third quarter of 2014
D Lowest at the start of the period
E $\quad$ Highest at the start of the period
$\square$
$\square$$\square$
$\square$
$\square$
9. Which one of the following is most likely to have caused the shift from SR
diagram below?
Price level

## ANSWER <br> Tick ( $\sqrt{ }$ ) one box only

A An increase in consumption
B $\quad$ An increase in the price level
$\square$

C An increase in wages
D An increase in the exchange rate
E An increase in immigration
10. As the price of a product rises following an increase in production costs which one of the following will rise?
ANSWER
Tick $(\checkmark)$ one box only
A
Consumer surplus
B Marginal utility
C Quantity supplied
D Total utility
E Quantity demanded
$\square$
$\square$
$\square$
$\square$
$\square$
11. If the central bank reverses its policy of quantitative easing by selling government bonds to financial markets then the most likely economic effect will be to:

# ANSWER <br> Tick ( $/$ ) one box only 

A Increase the size of the national debt
B $\quad$ Reduce long term interest rates
C Increase the size of the fiscal (budget) deficit
D Reduce the rate of growth of the money supply
E Increase the rate of inflation

$\square$
$\square$
12. The diagram below shows the market for a product in equilibrium at a price of $£ 50$ and quantity of 300 units per week.

What is the value of the producer surplus in the above diagram?

> ANSWER
> Tick $(\sqrt{ })$ one box only

| A | $£ 4500$ |
| :--- | :--- |
| B | $£ 6000$ |
| C | $£ 7500$ |
| D | $£ 10500$ |
| E | $£ 15000$ |

$\square$

$\square$
13. Aggregate demand in an economy is $£ 1400 \mathrm{bn}$, Consumption $=£ 800 \mathrm{bn}$, Investment $=£ 400$ bn, Government spending $=£ 300$ bn and Exports $=£ 100$ bn.

What is the level of imports?

|  | ANSWER <br> Tick $(\checkmark)$ one box only |
| :---: | :---: |
| A | $£ 100 \mathrm{bn}$ |
| B | $£ 200 \mathrm{bn}$ |
| C | $£ 300 \mathrm{bn}$ |
| D | $£ 400 \mathrm{bn}$ |
| E | $\square 500 \mathrm{bn}$ |

14. Which one of the following do you generally associate with a prolonged period of deflation in an economy?

# ANSWER <br> Tick ( $\checkmark$ ) one box only 

A A rise in investment
B $\quad$ A fall in the real value of debt
C A rise in consumer spending
D A rise in the level of imports
E $\quad$ A rise in real interest rates

15. The substitution and income effects of a price change are associated with the slope of the: [1]

> ANSWER
> Tick $(\checkmark)$ one box only

A Supply curve for a product
B $\quad$ Aggregate demand curve
C Production possibility frontier
D Demand curve for a product
E Aggregate supply curve

# ANSWER 

16. In the matrix below two firms $A$ and $B$ are selling a homogeneous product. They are both considering a pricing strategy unaware of the other firm's intentions and neither trusts each other. The profits each firm could make by selling at a price of $£ 4$ or $£ 3$ are shown in the matrix below.

|  |  | Firm $\boldsymbol{B}$ |  |
| :--- | :--- | :--- | :--- |
| Firm A |  | $£ 3$ | $£ 4$ |
|  | $£ 3$ | $£ 15 \mathrm{~m}, £ 15 \mathrm{~m}$ | $£ 30 \mathrm{~m}, £ 10 \mathrm{~m}$ |
|  | $£ 4$ | $£ 10 \mathrm{~m}, £ 30 \mathrm{~m}$ | $£ 20 \mathrm{~m}, £ 20 \mathrm{~m}$ |

It can be deduced that the Nash equilibrium occurs when:

# ANSWER <br> Tick ( $\sqrt{ }$ ) one box only 

A Both firms sell the product for $£ 4$
B Firm A sells for $£ 4$ and Firm B for $£ 3$
C Firm A sells for $£ 3$ and Firm B for $£ 4$
D Both firms sell the product for $£ 3$
E None of the above - there is no Nash equilibrium in this case

$\square$
17. Following a sharp depreciation of a country's foreign exchange rate all of the following are likely except:

A An improvement in the price competitiveness of exports
B A decrease in the balance of trade deficit
$\square$
B Adecease in the $\square$
C A rise in import prices
D An increase in aggregate demand $\square$
E An improvement in the terms of trade $\square$
18. The diagram below shows the market for a good with external benefits in consumption:

> MPC = Marginal private cost
> MSC = Marginal social cost
> MPB = Marginal private benefit
> MSB = Marginal social benefit

Which one of the following can be deduced from the above diagram?

Market equilibrium is at:

Socially optimal output is at:

The area of welfare loss is:

UVX
VXY
WXZ
UVX
TVZ

ANSWER Tick ( $($ ) one box only

| A | Q1 | Q2 | UVX | $\square$ |
| :--- | :--- | :--- | :--- | :--- |
| B | Q1 | Q2 | VXY | $\square$ |
| C | Q1 | Q2 | WXZ | $\square$ |
| D | Q2 | Q1 | UVX | $\square$ |
| E | Q2 | Q1 | TVZ | $\square$ |

19. A sharp increase in both supply and demand in a market would be likely to do which one of the following?

|  | Equilibrium <br> Price | Equilibrium <br> Quantity | ANSWER <br> Tick $(\sqrt{\prime})$ one box |
| :--- | :--- | :--- | :---: |
| A | Increase | Increase | $\square$ |
| B | Decrease | Increase | $\square$ |
| C | Unchanged | Increase | $\square$ |
| D | Cannot be sure | Cannot be sure | $\square$ |
| E | Cannot be sure | Increase | $\square$ |

20. The diagram below shows the short run and long run average cost curves for a firm.

Based on this diagram it is likely that as output increases the firm will experience:

## In the short run

A Increasing returns to the variable factor

B Diminishing returns to the variable factor

C Economies of scale

D Increasing returns to the variable factor

E
Diseconomies of scale

In the long run
ANSWER
Tick ( $/$ ) one box only
Economies of scale

Economies of scale

Diseconomies of scale $\square$

Diseconomies of scale

Economies of scale $\square$

## SECTION B

Answer all the questions in the spaces provided.
21. Explain, using a demand and supply diagram, why in theory a rise in demand for music downloads will have no effect on their equilibrium price.

## 25. SLASH TOP TAX RATE TO 40\%, OSBORNE TOLD

George Osborne last night faced fresh calls to cut the top income tax rate after it emerged that reducing it to $45 \%$ from $50 \%$ raised an extra $£ 8 \mathrm{bn}$. Figures released by HM Revenue and Customs yesterday revealed a huge rise in the amount paid in tax by high income earners following the Chancellor's decision to reduce the top rate of tax from $50 \%$.

With the aid of a diagram discuss the case for cutting the top rate of tax from $45 \%$ to $40 \%$. [8]

$\qquad$
$\qquad$
28. The US has recently accused a number of countries of keeping their exchange rates below their free market level. The US has chosen three criteria to use in order to help identify countries which may be using unfair currency manipulation against the US. These criteria are that the country has:
(1) a trade surplus of larger than $\$ 20$ billion.
(2) a trade surplus with the U.S. that is more than 3 percent of that country's own GDP.
(3) engaged in "Persistent one-sided intervention" in currency markets, defined as purchases of foreign currency amounting to more than 2 percent of the country's GDP in a one-year period.

Five countries (China, Japan, Korea, Taiwan and Germany) currently meet two out of three of these criteria.

Discuss how likely it is that a country meeting any two out of the three criteria above is manipulating its currency unfairly.
