Mark Scheme for June 2015

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

	Advantages	Disadvantages
Location	All 3 sites will have advantages for the region : Creation of jobs Multiplier effect Diversify local economy Development of out-of-town sites eases congestion in the town/city centre	Some disadvantages may apply to all sites: e.g. Increase in Noise/Air pollution (pollution type must be specified) Damage to aspects of the environment (must be specified e.g. habitats) Large companies move in and out compete smaller local businesses
1. EXPAND the site at Matford Park near Exeter	Flat land / easy to build on Near large city Good road networks / near M5 Range of existing businesses there / customer base Established site – much of infrastructure already in place	Using up open space / urban sprawl Damage to wildlife habitats Already busy area / likelihood of traffic congestion Not central to local region / only develops major city area Enclosed area – future expansion difficult
2. DEVELOP the site at Ware Barton	Greenfield site – easier to build than re-development Associated housing and leisure facilities nearby Already considered in Local Council Plan Would incorporate Park & Ride Good road links (A380 and M5) Potential for future expansion	Would use up arable farmland / greenfield site Increase urban sprawl Damage to wildlife habitats Visual pollution Increase traffic / becomes congested
3. REDEVELOP the Broadmeadow Industrial Estate	Brownfield site / No damage to wildlife habitats Would improve the visual impact Fulfil Teignmouth's need for modern commercial units Established Site – Infrastructure already in place Modern units would be better for existing businesses New layout of site would improve access for large lorries	Out of place in a Tourist / Seaside town A381 already a busy road / increased traffic congestion Existing businesses / might have to re-locate / be driven away Noise / Congestion problems during construction Further away from main trunk roads than the other sites *Cost / Time to clear site

As all sites have the same **FUNDING** and **LAND AREA** Cost can only be credited as developed points so for example:

A. Cost of bringing services into sites 1 and 2

B. Clearance of Site 3
